Board Meets Consolidated School

Thursday, March 27, '30 The Board of Trustees of the Chinook Consolidated School District, No. 16, met in their school on the above date at 2 p.m.

Minutes of last meeting were read.

Rosenau—That minutes be adopted as read. Carried.

Reading of correspondence and applications for van driving and presenting of bills.

McDonald—That payment of following bills be approved

Chinook Advance.....	\$24.70
Imperial Lumber Co.....	13.10
Lorne Proudfoot, hall license.....	1.00
Acadia Produce Co.....	12.10
Service Garage.....	14.10
E. E. Jacques.....	18.00
Western Municipal News.....	12.00
W. E. Bennett conveyance.....	50.00

Carried.

Rosenau—That \$8.70, balance from last year on children's lunch account, be paid into the funds for this year. Carried.

McLean—That Wm. Bredin be paid \$25 for a pair of 2-inch Macleod sleighs, almost new, when same are delivered at Chinook school. Carried.

McLean—That in view of the fact that a number of pupils in the higher grades of Chinook Consolidated School have made a very unsatisfactory showing in the recent tests, the chairman, on behalf of the Board, be requested to discuss the situation with the parents of the pupils concerned in order that the Board may be able to deal with the matter in the best interests of all concerned. Carried.

Hille—That Burt Austin be van driver on route 7 from April 1 to May 9. Carried.

McLean—That van drivers on route 5 be as follows: Jas. Young, February 10 to March 7; P. Demeare, March 10 to April 17; C. W. Rideout, April 28 until further notice. Carried.

McLean—That van driver on route 6 be as follows: Glen Johnston, February 24 to March 14; H. T. Lensgraf, March 17 to April 17; Cooley Bros., April 20 to May 23; Lawrence Bros., May 26 to June 30. Carried.

Rosenau—That Harry Lloyd be offered \$125 for kalsominizing the four class rooms, and that the chairman see him with regard to same. Carried.

Rosenau—That we do now adjourn to meet again on Monday evening, April 28, at 8 o'clock.

Lorne Proudfoot, Secretary.

High School Examination Results

In many cases the results are very unsatisfactory. If the unsatisfactory students are to be successful in their June tests, they will be required to do a great deal of careful studying from now until June. Parents are asked to kindly co-operate with the school in reducing activities for the children to a minimum, and seeing that their boys and girls are doing a liberal amount of homework every night.

Close application on the various school subjects is necessary in order to meet with success. There are now only a few days left until the final examinations, which begin on June 16.

Below are the results obtained by individual pupils on the Easter examinations, which have been completed last week. The first figure being the number of units attempted, the second the number of units passed, and the third the average marks obtained.

Grade XI.

Lyle Begon.....	4	4	90.7
Doris Marcy.....	7	7	89.7
Vincent Rideout.....	7	7	84.2
Madeline Otto.....	4	4	73.5
Eddie Bredin.....	6	6	70
Genevieve Johnson.....	6	6	65.6
Mildred Milligan.....	6	4	54
Alexandra McPherson.....	7	5	52.2
Gordon Agar.....	5	1	34.6

Grade X.

Eileen Bjork.....	7	7	69.1
Glady Wright.....	6	5	62.6
Thompson McIntosh.....	6	5	56.3
Sidney Demeare.....	5	2	47.8
Mabel Young.....	6	3	41.8
Ray Trogen.....	6	1	38.2

Grade IX.

John Howton.....	7	7	75.9
Celestine Dressel.....	7	7	72.7
Joan Bayley.....	7	6	70.1
Florence Connell.....	7	6	69.4
Marjorie Lee.....	7	7	67.1
Margaret McLean.....	7	6	63.8
Jean McIntosh.....	7	6	62.2
Eva McPherson.....	6	4	61.3
George Connell.....	7	3	59.4
Harmon Vanhook.....	6	5	48.1
Urdine Brownell.....	6	2	46.6
Norman O'Malley.....	6	1	31.5
Florence McPherson.....	5	1	23

All students that have failed in one or more subjects will be given another exam at the end of May.

Individual reports are being sent home with each student.

Tennis Club Will Hold Their Annual Meeting

The annual meeting of the Chinook Tennis Club will be held in Hurley's store Monday evening, April 7, at 8 o'clock. Those interested in tennis are invited to attend.

Miss M. Bayley, Secretary-Treasurer.

DELEGATION WAITS ON M.L.A.

On Thursday of last week a large delegation, composed of representatives from each of the towns along this line from the border to Youngstown, waited on Lorne Proudfoot, M.L.A., at the farm to take up the matter of improving the government road running east and west through these towns. The papers have announced that the Saskatchewan Government is going to improve the road between Rosetown and Alsaak. This is the continuation of this road to Saskatoon, and the delegation asked Mr. Proudfoot to press the Alberta Government to have this road improved, and

to have the work started on the east end, connecting up with the Saskatchewan highway.

The Oyen delegation had another matter to lay before the M.L.A., that of having the road running south of that town to the new oil field be made a government charge, owing to the heavy traffic which will go over it when the oil field is fully developed. The result of the visit was that a representation from each town, with Mr. Proudfoot, and interview the powers that be.

W. A. Todd, C. W. Rideout, W. S. Lee and L. S. Dawson were the Chinook representatives.

Old Timers Return

Mr. and Mrs. J. C. Hess arrived here Wednesday morning having motored through from San Diego, California, where they have been residing since they sold their farm, south of town, some six years ago. They rented the Stephens farm, 20 miles south of town, but returned to San Diego. They have returned to Chinook to stay. It speaks well for this district to have those who have tried other places return. The many friends of the Hess family will be glad to have such good citizens in our midst again.

On Thursday afternoon of last week the 1111 Rangers, with their leader, Rev. J. D. Woolatt, enjoyed themselves immensely at the Bjork home. The excellent meal served by the hostess was a big feature. Group singing was indulged in. Before leaving for the play room to hold their meeting the boys sang "Good Night, Lady".

Hospital Area Formed

Official declaration of the Youngstown Municipal Hospital District has been made, taking in the Town of Youngstown and the Village of Chinook, as well as the rural districts surrounding these urban centres, with the hospital located in Youngstown.

The citizens of Chinook and district had nothing to say in the formation of this hospital area but will have considerable to say when the vote is taken, and that is the time they should make themselves felt. The cottage hospital at Cereel, under Dr. Esler, is serving this district admirably. If the people of Chinook has a fair chance they will not allow themselves to be saddled with an everlasting encumbrance that is of no benefit to them. As much as we love our neighbors, we think the pressure too strong, and when the time comes our citizens will rise up and smite the enemy trying to hold them up.

There's "Gold" In The Golden Rule

A heading in a business magazine reads: "There's Gold In The Golden Rule," and the accompanying article proves it. There is no doubt that following the Golden Rule, in business as well as in life, in the long run will be more profitable than otherwise, and by this we mean materially profitable. There is a principle recognized by modern business that the business man, to be permanently successful, must contribute to the profit and welfare of those who deal with him, those from whom he buys as well as those to whom he sells. And in a measure, this is recognition of the Golden Rule.

But here comes the rub. Is the Golden Rule observed, even to such a limited extent, for itself or for the "gold" which may be mined from it. Is it observed because it is the right thing to do or because it is the more expedient, the more profitable thing? Are we to "do unto others" from pure delight in the doing, or because we wish to have them do the same to us? The real beauty, and force, and advantage of the Golden Rule lie in our attitude toward it. Its efficacy is in itself and in what prompts us to practice it.

Just to follow the Golden Rule because there is "gold in it," would be much the same as being honest because it is the "best policy." Neither impulse would rate high among the things considered admirable. To follow the Golden Rule because it charts the inherently right course in our dealings with our fellows and because we wish to be and to do right, is in the highest degree commendable. But to follow it merely or chiefly because "there's gold in it" is—well, not something we would care to boast about. The greatest profit which comes from living the Golden Rule cannot be set down in dollars and cents.

Throughout Western Canada our people have largely accepted and adopted the principle of co-operation in connection with their economic relations and business. Unfortunately, it is not quite so generally accepted and acted upon in other community relationships. The question, therefore, naturally arises: Has this acceptance of one of the principles found in the Golden Rule resulted from a belief that "there's gold in it," rather than from a conviction that co-operation is indeed the better way for all concerned? Have we established, and are we maintaining, our great co-operative enterprises solely on a dollar and cents basis, or are a majority of our people earnestly striving to, in this way, make some contribution to the welfare of others?

Many fine and lofty sentiments—the sentiments of the Golden Rule—have been uttered by advocates of co-operation, and we are convinced that scores of men and women have joined co-operative organizations, not because they felt that themselves would reap any particular benefit, but because they felt such organizations would be the means of benefiting others and the country as a whole. They are practising the Golden Rule because they believe it to be right, not because there may be some "gold" in it for them.

And if co-operation is to live and continue as a vital force in the life and activities of this country, if it is to grow and develop as a great compelling influence and force, not only in an economic sense but in all our community life, it must be through a general acceptance of the view, and its practice in everyday life, that selfishness is wrong and unselfishness is right; that the welfare and happiness of others is our concern as well as theirs; that the Golden Rule is to be practised not because there is "gold" in it for us, but because it is the only correct rule by which to measure our lives and acts; that we must be honest with each other, not because it is the "best policy" but because it is right. If we expect others to accord honesty to us in our conduct, we must show them respect and believe in the honesty of convictions entertained by others.

True co-operation is founded on the Golden Rule. It is its underlying principle. It is the only foundation upon which our great co-operative organizations can safely build, not because there is "gold" in it for anybody, but because it is the only safe rule for human conduct and intercourse.

Wheat Sales Affected

**Eating Habits Of Those Who Desire
Slenderness, Is Held Responsible**

The modern feminine desires for slenderness, according to Professor James L. Boyle, of Cornell University, has altered market standards of long standing, cut the consumption of bread by 20 per cent. and considerably affected the wheat sales of the world.

Doctors, nurses, schools and even beauty parlors have helped to bring about these changes, the professor said in an address recently. Meat consumption also has declined, those in search of necessary vitamins preferring oranges, grapefruit, pineapples, lettuce, tomatoes and cantaloupes.

"All these changes in customers' food habits can be considered as market developments," Professor Boyle said. "The consumer is the most important of the people concerned with marketing."

To Study British Methods

**Chinese Officers Will Learn How
"Big Time" Navy Is Run**

Twenty Chinese naval officers and cadets have gone to Great Britain to study British methods of running a "big time" navy.

They are making the trip at the invitation of the British Government, and will remain about two years.

The officers in the party expect to enter Greenwich Naval Academy and take the same course in tactics as British students. The cadets, however, must first spend some time on various naval vessels to learn the rudiments of British naval practice.

Makes Breathing Easy. The constriction of the air passages and the struggle for breath, too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untried, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

Interesting Records

Among the most valuable records preserved in the Public Record Office of England, are the pipe rolls, a statement of the King's income and expenditures, so called because they are rolled in the shape of pipes. They date back to 1131 and were not discontinued until 1833.

Apple Trees For Prairie Farms

**Sixteen Varieties Of Apples Found
Suitable For The West**

After fifteen years of seed planting the experimental work of the Dominion Department of Agriculture has developed sixteen varieties of apple trees suited to the climatic conditions of the Prairie Provinces. Of these varieties two have been graded "very good" and four "good." Horticultural experts point out, however, that it will take several more tree generations to evolve the ideal species. Prairie farmers can help in this work by getting seed from the Experimental Station at Morden, Man., for planting in their own gardens.

DO YOU FEAR A HEARTY MEAL?

**Dr. Williams' Pink Pills Will
Tone Up Your Stomach Making
Mealtime a Pleasure**

Are you afraid of meal-time? Does eating distress you? Would you rather go without food. That is the condition of many due entirely to indigestion. There can be no perfect digestion—hence no enjoyment of meals—unless there is a strong red blood. This pure blood is necessary to tone up your stomach and make it capable of properly digesting the food.

Many so-called stomach remedies merely try to digest your food for you. That is a mistake—nature should do that work and if nature does not do it serious results are bound to follow. Tone up your stomach by driving out the poisons that are in the blood. Make new rich blood and your appetite and digestion will soon be normal—meals will once more be a pleasure.

The one sure medicine to enrich the blood, restore strength and banish stomach trouble and indigestion is Dr. Williams' Pink Pills. Concerning them Mr. W. L. Thompson, Brussels, Ont., says:—"For years I suffered with indigestion, headaches and dizzy spells. I tried a great many so-called remedies without relief. As a farmer's wife, with three little girls, it was almost impossible to be idle and I just dragged myself through my work. I suffered so I was actually afraid of meal time."

A friend advised the use of Dr. Williams' Pink Pills, and although I had lost faith in ever being well again, I gave them a trial. To my surprise, gradually the dizziness and headaches left me. My appetite improved and soon I was able to enjoy my meals. I gained in weight and my health in general is better than it has been for years. I feel I owe much to Dr. Williams' Pink Pills for they relieved me of all my misery."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

New Species Of Whitefish

**Newly Discovered Member Of Finny
Tribe Found In Manitoba**

Discovery of a new species of whitefish in Clear Lake, Manitoba, is announced by A. Bajkov, of Manitoba University. The new species has been named Coregonus Odontognathus, in honor of Dr. C. H. Odontognathus, formerly of the faculty of Manitoba University. The newly-discovered fish is common in Clear Lake. It lives at a great depth during the summer, coming to the surface only in the spawning season.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Covered Long Distance

Walter E. Davidson, carrier on a rural route from the post office at Westville, Indiana, for 25 years, retired recently on a pension. During his service, Davidson wore out seven autos, nine horses, two wagons, and two sleighs, and travelled approximately 223,000 miles, a distance only 1,776 miles short of nine trips around the world.

A Matter Of Opinion

It is announced that Ontario and Quebec are to have "new penitentiaries which will be models for the world." This brings to mind the presentment some years ago of a Brantford, Ontario, grand jury, in which was stated that conditions at the local jail were such as to make it "one of the most desirable places of residence in the city."

Imperial Agricultural Conference Arranged

**First Meeting To Be Held In South
Africa In 1932**

Another link is being forged in the chain of Empire unity. To the present Imperial gatherings will be added an Imperial agricultural conference, and the first meeting will take place in the Union of South Africa in 1932. The conference will meet every second year.

A tour of New Zealand by farmers from Britain, Canada and South Africa provided the opportunity for deciding on an Imperial conference. Lord Bledisloe, who has been called Britain's leading farmer, and who has come to New Zealand to assume the governor-generalship, addressed a conference of the visiting farmers and representatives of farmers in this great agricultural domain recently.

Lord Bledisloe called the present meeting a landmark in the history of the empire. He stressed the vital importance of uniformity in the production and sale of agricultural products if a settled, continuous market for these products was to be secured.

The British Empire Producers, Empire Marketing Board and similar organizations will be asked to circulate propaganda on behalf of empire agricultural products; empire preferences will be further discussed, and information will be gathered so the next conference can study financial and marketing organizations for farmers, as well as the extension of foreign markets.

Persian Balm is inevitably chosen by discerning women. Delightful to use. Subtly fragrant. Cooling and refreshing. Imparts a rare youthful charm to the complexion. Invaluable for softening and making hands flawlessly white. Tones and stimulates the skin. Useful for the family also. Protects the tender skin of the child and is excellent for the father as a hair fixative and cooling shaving lotion.

Mark Twain's Immortal Boys

**Last Survivor Of Famous Quartette
Died In Seattle Recently**

"Huck" Finn, Tom Sawyer, Mark Twain and Erastus Finn—kids who used to play together in Hannibal, Mo., years back—are all gone now. The last to go was Erastus Finn, who was not as well known as the others, made so famous by Mark Twain. Ninety-five years old and a veteran of the civil war, Erastus Finn died in Seattle, a victim of pneumonia.

In recent years the old man loved to recall memories of his boyhood days when he and his brother "Huckleberry" and Samuel Clemens were friends of Tom Sawyer.

"Huck" Finn died a few years ago in Eugene, Ore. They're all gone now, are Mark Twain's immortal boys.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every drop of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Times will not be much better so long as the new model of an automobile creates keener interest and invites closer inspection than a grand champion animal at an international exhibition.

Jed—"How did you find your wife when you got home last night?"
Ted—"Just as nice as pie."
Jed—"How's that?"
Ted—"Short and crispy."

Minard's Will Stop That Toothache.

Town Planning Advantage Shown

**An Attractive Community Depends
Greatly Upon the Appearance
Of Its Streets**

The following advantages that accrue from a systematic effort at town planning are given by Mr. Stewart Young, of the Town Planning Department of the Saskatchewan Government:

The general appearance of any community is most important, and if ways and means by which more agreeable surroundings can be produced are analyzed, it will be found that an attractive community depends greatly upon the appearance of its streets.

The appearance of a business street may be marred by the use of the sidewalks for storage or advertising purposes. Curb gasoline pumps do not add to the appearance of any street and should be prohibited. Electric light and telephone wires, when placed on a street tend to give it a ragged appearance. They should be placed underground in conduits or on inlets.

The appearance of the residential streets of any community reflects the mental attitude of the citizens. Every community should have a definite policy in respect of tree planting on residential streets. The boulevard system should be used.

Usually a sidewalk four and a half feet in width placed at a distance of about two feet from the street line with a graded roadway about twenty-four feet in width is sufficient to accommodate all traffic on residential streets. The intervening space between the sidewalk and the vehicular traffic way should be planted with trees spaced about twenty feet apart, and alternated slow and fast growing.

Several advantages are to be gained by this method of planting. Fast growing trees mature in a period of from twenty to twenty-five years, at the end of which time the slow growing tree has reached a stage where it becomes useful. Moreover, insects seldom attack more than one variety of tree in a season. The result is obvious where a street is planted entirely with one variety of trees.

Deliver Tea By 'Plane

**Tea Freight, Begun On Oxen-Cart,
Ends With Trip On Aeroplane**

It is a far cry from the slow-moving, primitive, high-wheeled cart, hauled by oxen along the roads of Ceylon, to a speedy aeroplane in the winter sky over Lake Erie, but many of the people of Pelee Island are now drinking tea, carried there by air, that joggled along in an ox-cart under a tropical sun in Ceylon only a few weeks ago.

The Salada Tea Company, because of the freezing over of the mainland, recently shipped several hundred pounds of tea by air, in order to replenish the diminishing stock of a certain grocer on the island.

Test Is Satisfactory

The annual retest of the herds in the Fraser Valley, B.C., for T.B. is being carried on at present by about twenty veterinarians. More than half of all the dairy cows in the province (55,000) are located within this area and in the last test only three quarters of one per cent. re-tested.

New Municipal Bridge

The cities of Winnipeg and St. Boniface are conferring on the question of a new inter-municipal bridge to replace the present Norwood bridge.

**Don't Let Foods
Stale**

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Western Representatives:
HUNTER-MARTIN & CO., REGINA, SASK.

RESEARCH WORK FOR THE BENEFIT OF AGRICULTURE

Regina.—Recommendation will be made by the Agricultural Committee of the Canadian Chamber of Commerce, following a session here, that research work in Canada be extended in all the provinces of Canada, and that further methods be adopted by the Canadian Chamber of Commerce to bring the results of such research to the knowledge of individual farmers as far as can be done.

A second resolution was passed that "the conference suggests to the Canadian Chamber of Commerce that a national bureau of agriculture be established in the Canadian Chamber of Commerce, which bureau would be completely directed by one or more recognized experts, whose duties it would be to survey the whole question of agricultural production, marketing, research, education, grading, standardization and so forth; and make available to the agriculturists and to business, findings and recommendations which because of their authoritative, impartial and thorough nature will commend themselves as sound national procedure and inspire greater confidence on the part of our producers, middlemen and consumers."

In this connection the Regina conference will recommend to the Agricultural Committee of the Canadian Chamber of Commerce that this committee recommend in turn to the Dominion Government that a committee be set up to study agricultural problems in Canada, members of the body to be men familiar with the economics of agriculture.

"What's Ahead for Agriculture in Canada?" was the question upon which the National Agricultural Committee of the Canadian Chamber of Commerce based its discussion at the opening session of a meeting at the Saskatchewan Hotel, Col. Robert McEwen, London, Ont., presided.

Representatives attending the meeting were welcomed by Col. J. H. Woods, Calgary, president of the Canadian Chamber of Commerce; and by George H. Barr, K.C., Regina, Saskatchewan vice-president of the Canadian Chamber of Commerce.

Hon. J. D. MacGregor, lieutenant-governor of Manitoba, told the meeting that, in his opinion, the day of \$1.75 wheat had passed, and emphasized his opinion that the farmers of the prairies must enter diversified farming. The climate and the various soils of the prairies were admirable for the growing of forage crops and thus the possibilities for live stock were great.

"Pay your taxes with your stock and have the returns from your grain crop as well," was the advice of Hon. Mr. MacGregor was winner of the grand championship at the Chicago International Exhibition for the years 1912 and 1913, and is known across the continent as one of the leading stock men of Canada and the United States.

George H. Barr, K.C., spoke of the opportunity for service provided through the medium of the Canadian Chamber of Commerce.

Amendment Is Lost

House Of Commons Defeat Amendment To Bill Providing For Divorce Courts

Ottawa, Ont.—The House of Commons defeated the amendment of Thomas McMillan, Liberal member for South Huron, to the Woodsworth Bill providing for divorce courts in Ontario, by twenty votes. The vote stood: for 88, against 108.

The amendment expressed regret at the spread of divorce in Canada, and advised a campaign to foster the idea of the sanctity of the home in the Dominion.

After the vote on the amendment, there were calls for a vote on the main motion. Mr. Speaker Lemieux ruled that as the private members' hour had expired, it would not be possible to take this vote if any one objected. George Spotton, Conservative, North Huron, objected, so the vote was put over until another sitting.

Bandit Gets Heavy Sentence

Hamilton, Ont.—Fred Brooks, bandit, said to be from Saskatchewan, who tried to hold up Bert Irving in his drug store recently, but was overpowered, was sentenced to seven years by Magistrate Burdidge. He is also to receive 30 lashes in three instalments. He pleaded guilty to armed assault.

W. N. U. 1831

Millions For Good Roads

Saskatchewan Government Has Ambitious Program For This Season

Regina, Sask.—Nearly seven millions will be spent on Saskatchewan roads this season, it was announced in the legislature by Hon. A. C. Stewart, K.C., Minister of Highways, during the course of the debate on the budget.

The total of \$6,852,386 is to be divided as follows: On trunk highways, \$2,063,585; gravel surfacing, \$3,373,801; sundry grading, \$395,000; colonization roads, \$120,000. The latter refers to roads in newer districts of the province, part of the scheme of the new Anderson government.

Mr. Stewart assured the members that there was no intention on the part of the government to create a highways commission or of abandoning the present department of highways. Roads of the province, however, construction and maintenance, would remain as they have always done, under the direct control of the minister.

British Coal For Canada

Tonnage Chartered For Trade Says British Minister Of Employment

London, Eng.—Very considerable orders for British anthracite and soft coal have been obtained in Canada, said Rt. Hon. J. H. Thomas, lord privy seal and minister of employment, in the House of Commons. The minister was questioned by Sir Kingsley Wood, Conservative member for West Woolwich, who asked if anything had been done to secure westbound cargoes for the grain boats coming from the Dominion. Sir Kingsley suggested coal as the most national article of cargo exchange.

"Yes sir," replied Mr. Thomas quickly, "my information is that very considerable orders for British anthracite and soft coal have been obtained in the Dominion and I am able to announce that a substantial volume of tonnage has been chartered for this trade to commence with the opening of the St. Lawrence navigation."

Tenth Anniversary Of Suffrage Celebrated

Luncheon Party In Forty-Two States Joiner By Radio

Washington, D.C.—The National League of Women Voters on March 26, celebrated ten years of women's suffrage with a chain of luncheon parties stretching across the United States.

The birthday parties were arranged in 42 states. The luncheon tables were joined by a nation-wide radio hook-up, with Carrie Chapman Catt, silver-haired, 70 years old, the grand old lady of women's suffrage, addressing the thousands of celebrants.

The birthday celebration was the first of a series planned for the next few months in recognition of the first decade of women's voice in government. A convention will be held in Louisville, April 18.

Will Not Resign

Hon. Dr. Godfrey Will Stand Pat Over Famous Postscript Episode

Toronto.—Hon. Dr. Forbes Godfrey, Minister of Health for Ontario, has reiterated his stand that he will not resign because of the public rebuke administered to him in the legislature by Premier G. H. Ferguson, over the now famous "postscript episode." He also denied a rumor that he will take a long vacation.

It was for his action in adding a postscript to a letter written to a constituent of his in which an application for a mother's allowance, made by a woman residing in Long Branch, was refused.

The postscript reads as follows: "See her if you can and get her support the 30th (election day), and we will be able to take more time with the case."

Purchase Earnscliffe

British Government To Spend \$125,000 For High Commissioner's Residence In Canada

London, Eng.—The governmental estimates for the coming year, tabled in the House of Commons, provide the sum of \$125,000 for the purchase and adaptation of the British high commissioner's residence in Ottawa, "Earnscliffe."

Buildings in use by the diplomatic service will prove rather costly this year. The new Washington embassy will account for the expenditure of \$170,000. The Tokio embassy, destroyed by fire, will be rebuilt at a cost of \$330,000. The embassy at Moscow will call for \$100,000.

Airmen Reach Railway

Vance and Blasdale Complete Long Trek Southward

Winnipeg, Man.—Jim Vance and Brian Blasdale, Northern airmen who wintered at Baker Lake, off the west coast of Hudson Bay, have completed a 100-mile trek southward by dog-team. They reached the fringe of civilization March 26, when they entered Gillam, which is 100 miles from the Hudson Bay Railway, and the farthest north point to which the "Muskeg Limited" is operating along the line to Churchill.

SHORT LINE TO THE PAS WILL BE OPENED SOON

Winnipeg, Man.—Construction work on the Sturgis-Hudson Bay Junction branch line of the Canadian National will be finished about May 15, and the line will be turned over to the operating department on that date. An announcement to this effect was made by A. E. Warren, western vice-president of the Canadian National.

A very considerable saving in time and distance between Southern Saskatchewan and the Hudson Bay Railway will result with the completion of this line and the opening of it for regular freight and passenger service. Between Regina, Moose Jaw and other southern points in Saskatchewan there will be a lessening of 94.6 miles over the existing route from those centres to The Pas.

Intermediate points such as Melville and Yorkton will also be brought considerably nearer to The Pas and the Hudson Bay Railway. Until the Sturgis-Hudson Bay Junction line goes into operation the route from Regina to Hudson Bay Junction is via Swan River, a distance of 429.6 miles. The distance by way of the new route which lies through Melville, Yorkton and Canora will be 335 miles.

Passenger and freight train services are now under consideration by the departments concerned and it is not expected that an announcement on train service will be made for a few weeks.

The Sturgis-Hudson Bay Junction line was one of those included in the three-year branch line program which was passed by parliament in 1927. Although it is practically the last item on that program to be completed the date upon which it is to be turned over for operation is more than six months ahead of that set by the bill.

Severe Earthquake In Orient

Victoria, B.C.—Superintendent F. Napier Denison, of the Geological Observatory here reported that a severe earthquake had been recorded on the seismograph with its centre somewhere in China or Japan. The quake started to record 11.21 o'clock and continued for three hours.

France Plans Grain Reserve

Paris.—Establishment of a government reserve supply of grain to assure a proper amount for the population in times of emergency and to allow a certain government control of domestic prices has been approved by the Chamber of Deputies.

West Grows Airminded

Western air mail service between Winnipeg and Calgary—over 800 miles in distance—has been inaugurated recently and the Canadian Pacific Express Company has renewed its contract made in 1928 to carry express packages in addition to the regular mail. This allows of a saving of more than 24 hours between the two cities. The package which pilot W. J. Buchanan is shown delivering to a Canadian Pacific Expressman, was mailed eight hours previously at Calgary and had therefore travelled at the rate of more than 100 miles an hour to reach Winnipeg, its destination.

NEW APPOINTMENT

Emile J. Hebert who has been appointed passenger traffic commissioner, Canadian Pacific Railway, effective April 1. Mr. Hebert has been connected with the railway almost since its inception in the passenger department. His associations with French-Canadians all over Canada are at once close and wide.

Overseas Wireless Phone

Direct Wireless Telephone Service Between Canada and Britain Is Contemplated

Ottawa, Ont.—Confirmation of the statement of Hon. H. B. Lees-Smith, British postmaster-general, respecting the contemplated establishment of a direct wireless telephone service between Canada and Great Britain was obtained from officials of the Department of Marine. So far, however, the matter has not gone beyond the negotiation stage.

When the system is established it will operate through the Marconi beam wireless at Drummondville, Que., from where the transmission will be direct to Rugby, England. This circuit has been operating experimentally for the last year. It was employed recently in the broadcast of the King's speech at the opening of the naval disarmament conference. Officials were unable to say when the system will be inaugurated commercially.

Opened Exhibition By Radio

Marconi Spoke From Genoa, Italy, To Sydney, Australia

Genoa, Italy.—Short radio waves cutting across the Atlantic, America and the Pacific carried the voice of Marquis Guglielmo Marconi, inventor of wireless, from his yacht *Electra* here, to Sydney, Australia, to open the electrical exposition there.

Marconi spoke across 11,000 miles to Director J. Fisk of the electrical association, reading a message which outlined what he intended doing later in the day—transmitting a small unit of power to Sydney in order to close a circuit there and light the electric lamps of the exposition.

Heavy Penalty For Hobber

Montreal.—The maximum penalty of 14 years in the penitentiary was given Robert A. Watson, who confessed to a series of armed robberies in Montreal during the winter; when he appeared in police court here. Watson called himself the "Lone Wolf" and robbed some half dozen managers of chain stores and other premises during his career here.

Calgary Has Glider Club

Will Purchase Training Glider and Commence Flying Soon

Calgary, Alberta.—Calgary, disinterested Canadian glider flight was made, tinged as the place where the bids fair to become the first city in the Dominion with two glider clubs. Headed by W. L. Rutledge, captain, and H. H. Kenyon, vice-captain, eight directors of the Foothills Glider Club were elected by a meeting of two enthusiasts at the municipal airport. Plans are to purchase a training glider immediately and commence flying early in the coming season.

DEVELOP PUBLIC OPINION ALONG PEACEFUL LINES

Ottawa, Ont.—Contribution of moneys to Canadian universities for establishment of chairs in international relations is a field in which it might be better for the Dominion Government not to intervene, believes Dr. O. D. Skelton, under-secretary of state for foreign affairs. Dr. Skelton spoke before the House of Commons committee on industrial and international relations.

His comments referred to a resolution of Miss Agnes McNeill (Prog., South East, Gray), asking that for every \$100 disbursed by the Canadian Government for war, \$1 should be spent for promotion of peace. The resolution favors setting up a chair of international relations and institution of international scholarships in each Canadian university.

Cost of establishing such chairs was set at \$3,200,000 by Dr. Skelton in answer to a question by A. W. Neill (Ind., Comox-Alberni).

Dr. Skelton thought that in some cases establishment of chairs of international relations would be desirable, but in most instances he believed it more useful to develop general knowledge of social science.

The question of what the Dominion Government should do in the way of establishing additional scholarships found Dr. Skelton of the opinion that, so much having already been done by individual and organized effort, the way was clearly indicated that this system should be continued.

As far as he could see, there were three specific points developed by the parliamentary debate. One was to ascertain how public opinion could be developed to deal with the big task thrust upon the people of Canada and what part the Dominion Government should play in shaping that public opinion. A second was how to train personnel in the conduct of international relations and what part the government should take in the training of that personnel.

The third envisaged the agencies the government should develop for carrying on the immediate and direct tasks of conducting the relations of foreign and inter-imperial governments.

Dr. Skelton felt that the elementary and secondary schools could do much to humanize the training of youth in international matters.

Another element was the press. A survey of the press of Canada, said Dr. Skelton, was not disheartening. It would compare very favorably with that of most countries, and the information supplied by the Canadian press was not only adequate but probably less biased and more objective than that published in the press of a great many other countries. The fact that in the past two years there had been established press bureaus in London, Paris and Washington indicated how much the press was contributing to the general knowledge of international matters.

Other factors in developing public opinion were the movies and radio. These were if anything "too international." International travel also furnished many opportunities for broadening the outlook of Canadian people.

Many organizations were doing valuable work. Such were the Association of Canadian Clubs, the Institute of International Relations, the Canadian Problems Society and the League of Nations Society.

Besides all these factors the Dominion Government and parliament did much through the utterances of its members. He did not approve of the Dominion Government entering into organized propaganda with a view to moulding public opinion.

One of the ways in which the government could help would be through aid to the league of nations society. The government might supply material to schools and colleges on international relations, but on the whole the task of developing public opinion was one for voluntary organized effort.

TRADE TREATY WITH AUSTRALIA TO BE RETAINED

Ottawa.—Both the sub-amendment, calling for revision of the Australian treaty, and the amendment declaring that it should be abrogated, met with defeat in the House of Commons. The sub-amendment, which was moved by Hon. H. H. Stevens (Cons., Vancouver Centre), was defeated by a vote of 103 to 51. The amendment, which came from Robert Gardiner, U.F.A. member for Acadia, was even less successful. It was lost by 141 to 16.

Party lines were followed closely in the division on the sub-amendment. All the Conservatives present, and H. B. Ashdend, Liberal member for East Calgary, favored the Conservative proposal. Lined up against it were all the Liberals, Liberal-Progressives Independent members, Progressives and members of the U.F.A.

Support of the U.F.A. amendment calling for abrogation of the treaty came from members of the U.F.A. party, Progressives, and one Liberal, A. Boucher, the Conservatives, Liberal-Progressives and Independent members.

Following defeat of the sub-amendment and amendment, the government motion to go into supply was declared carried. This motion has been before the House for some days but discussion of the Australian treaty has prevented its passage.

British Companies Interested

May Invest In Oil Fields and Later Build Steel Mill

Calgary, Alberta.—Laying down of a million dollar stock and oil-well drilling and operating equipment in Calgary during the coming summer and later establishment of a steel mill in this city or Vancouver if the market proves sufficiently attractive are being recommended to the large British financial and manufacturing interests represented by R. A. Raymond. Mr. Raymond has spent some time looking over the market provided by the Turner Valley field.

While desiring to give out the names of the British companies which are interested, he stated that they are in a position to handle Canadian business in practically unlimited volume. And it was possible that a merger of a number of well-known firms engaged in oil and steel manufacturing industry may be formed with a subsidiary Canadian company to handle the business in the Dominion.

Wheat For Starving Chinese

Western Farmers Asked To Donate a Bushel of Grain For This Purpose

Winnipeg, Man.—Pleas from far off China, where millions have died of starvation and millions more face a like fate during the coming year, have reached the little settlement of Demailne, Sask., centre of a thriving agricultural district.

From business men and agriculturists of the district comes a plan to aid the people of the northern sections of China, where 5,000,000 persons have perished from hunger and privation.

The thousands of farmers of the western prairies are urged, in a resolution adopted at a meeting of Demailne folk, to donate one bushel or more of wheat each, and the railway companies of the Dominion are requested to arrange free transportation of this grain to the Orient.

Elected Party Leader

J. W. McDonald Is Chosen As Leader Of Liberal Party In Alberta

Calgary, Alberta.—J. W. McDonald, K.C., former mayor of McLeod and prominent in political life of the province, was elected leader at the convention of the provincial Liberal Association.

The election was made on the third ballot, and Mr. McDonald will ascend to the post previously held by Captain M. T. Shaw, K.C.

The race for leadership was close between Mr. McDonald and W. R. Howson of Edmonton, and H. Montgomery, of Wetaskiwin, who were the other candidates.

May Try Atlantic Flight

Friedrichshafen, Germany.—The huge German Dornier Do-X will attempt a flight to the United States this summer, providing trial flights with motors from the United States to be installed this month prove satisfactory.

Topographical Map of Humboldt

Interesting Facts in Connection With
Early History of the West

Few people can resist the fascination of a modern map with its implication of travel and appeal to the imagination.

Particularly fascinating are the maps of Western Canada where changes are swift and continuous. A case in point is the Humboldt Sheet of the Sectional Map of Canada, embracing 4,300 square miles of central Saskatchewan between townships 33 and 40, ranges 15 to 29, west of the second meridian, of which the 7th edition since 1902 is now off the press of the Topographical Survey, Department of the Interior.

In very early days in the West, people travelled almost wholly by water. As the Humboldt area lies nearly forty miles from any water route it remained an unknown land except for occasional winter travellers until the construction in the '80's of the main line of the C.P.R. to the south, when Humboldt telegraph station became the half-way point on the stage route between Qu'Appelle and Prince Albert.

On his way north to survey a portion of the Arctic coast, in December, 1836, Thomas Simpson travelled diagonally across this area. His approximate course across the country is indicated by the line of the Canadian National Railway northwesterly. Taking observations by the way, as did most of those early explorers who had a working knowledge of surveying, Simpson appropriated the carload intended for him for the carriage of his books and instruments, travelling himself all the way to Athabasca on foot.

Quill lakes, on the southeast corner, 1703 feet above sea level, he refers to as "Lac aux Plumes" and informs us that they derived their name from the multitude of wild fowl that moulted there every summer. The portions of these lakes falling within the mapped area cover seven townships and have been reserved for a Bird Sanctuary, together with Lenore lake at the north centre of the sheet, while Ponnas lake on the eastern boundary has been created "Public Shooting Grounds Reserve."

Simpson described his route across the eastern half of the tract as being from one deeply curved woods to another, "as if traversing successive bays of the sea to which these great plains that reach to the Rocky Mountains may well be likened." In spite of the fact that the district is well settled, some of this forest still remains and the woods, tinted in green on the map, appear much as they did 94 years ago. Christmas Day, 1836, he travelled 31 miles, passing over or near what are now the villages of St. Gregor, Muenster, and Carmel, and the town of Humboldt. Northeast of Humboldt, from the summit of Mount Carmel, he and his guides obtained a view of a boundless prospect of plains to the south with belts of woods to the north. West he saw a "seemingly endless tract of open underwood varied by gentle swelling eminences, thickets and hillocks, interchangingly with still further more open country varied by coteaus or bare ridges and here and there in the hollows large ponds."

This might be a terse description of the terrain as it now looks except that, where not a building or farmstead stood at that time, and few even sixty years afterwards, now-adays the expanse is dotted with the homes of settlers who have gone into the tract since 1902.

Some years after Simpson, in the midsummer of 1872, the Sandford Fleming expedition passed across the tract on their way to examine the Yellowstone Pass for the C.P.R. and to report on the intervening and extending countries. Climbing the same hill from which Simpson obtained a view in 1836, the secretary of the expedition commented rapturously on

the roses, marigolds, golden rod, lilac, bergamot, white tansy, bluebells, hellebore, and asters in such a profusion of colour that his impression was of an earthly paradise, but he says sadly, "Where hundreds of homesteads shall yet be, there is not one!" Yet the new map now shows on the area 6,270 buildings exclusive of the towns and villages.

Those were the days of great buffalo hunting expeditions from Red River, when hundreds of people travelled together in a picturesque brigade, the men riding, the women driving the Red River carts, and the children general "Choppers" for the women. Captains and policemen were elected to preserve order, outposts set, laws made for the hunt and strictly enforced by fines or the destruction of the clothes and accoutrements of the offender, or by expulsion from the brigade. A hunt over this very country has been vividly described as like the assault of light cavalry on an immovable foe, the dark moving sea of numberless buffalo. Even a few years ago there were traces of the buffalo brigade camps where the women and children prepared the dried meat and pemmican and dressed the hides after a slaughter which did not cease until all the carts were well filled, when the little army returned home. Curiously enough many of the railways have been built along the travellers' routes of early days. These in turn followed roughly the buffalo trails which were never far from water and thus tended to seek the lowest level.

By 1879 another traveller describes meeting train after train of Red River carts with freight going westward heavily laden with supplies for the new settlements in the Prince Albert, Battleford and Edmonton districts, or returning empty to Winnipeg. Each day, places that had been the camping grounds of others were passed, the square of soil dug by the careful freighters that formed a place, the ridge poles left lying on the ground, the ashes of campfires and little enclosures ten feet square where smudges had been made against the assaults of ubiquitous mosquito. Incidentally he mentions that the telegraph line having been down for two weeks, he was unable to send a telegram from Humboldt. About this time a surveyor paid seven dollars for a telegram which took a month to reach its destination.

More impressive than caravans of buffalo hunters, and brigades of freighters must have been the sight of General Middleton's column of 950 men marching in April, 1885, from Qu'Appelle to the Saskatchewan and pausing at Humboldt telegraph station, some six miles southwest from the present town of Humboldt, for a rest of two days. After the column rode Boulton's Scouts, most of whom were the surveyors who before and afterwards laid out lands all over this country. Their way lay along the stage-coach mail route which followed roughly the Canadian Pacific Railroad Lanigan-Prince Albert Branch.

The romantic past of the Humboldt territory has been replaced by the practical present whose brigades and caravans are trainloads of wheat and cattle eastward, and manufactured necessities and luxuries westward by way of eight railway lines that net the region.

Losing One's Temper

Rage Poisons the Brain and Will Shorten Your Life

Lose your temper and you shorten your life. Flying in a rage poisons the brain, strains the heart, unstrings nerves. A bad temper and good health cannot permanently go hand in hand. In the days of yore men of violence, hot tempers were more common than they are today.

In the modern organization the fiery-tempered individual is out of place. Harmony oils the machinery of business; discord casts sand into the gearbox. Temper kills teamwork. Therefore, for the sake of your own health and for the sake of the health of your business, don't let your temper get out of control. An uncontrollable temper is as destructive as an uncontrolled engine. —Forbes Magazine.

Needed the Water

Cooper had been standing in the coal cellar with his fingers glued firmly over a leak in the water main. "George," he cried, "you can take your hands off that leak now."

"Thank heaven," replied her husband. "Has the plumber come?"

"No," was the answer, "but the house is on fire."

Investments Abroad

Canadian investments abroad at the end of 1928 amounted to \$15,787,074,000, according to an official estimate. Of this amount \$874,626,000 is invested in the United States; \$131,915,000 in the British Isles; and \$572,529,000 in other countries.

W. R. DEVENISH

General Superintendent of the Canadian National Railways, Edmonton, who has been appointed General Superintendent of the Manitoba District, with headquarters in Winnipeg.

Requires Some Solving

Question Of Supply and Demand Is First Class Problem

At the present time it is said that there is too much wheat in the world, too much wool in the world, too much coffee in the world, too much rubber in the world. There is so much of each that the world price is affected, which means that the people who produce coffee, rubber, wool and wheat are not getting a price that is considered profitable.

What is to be done about it? The articles referred to are regarded as necessities in the modern world and yet the demand for them is not sufficient to keep the price at a level that is required to meet costs of production.

At one time in the world's history a gentleman named Malthus predicted that if the number of the people in the world were not kept to a certain level there would not be enough food for all, and the human race would face starvation. He urged the limitation of population. Instead of that coming to pass we have a world today in which limitation of production is seriously discussed because there are not enough people to use the commodities that are being produced. It is true that the rice night use more products if it had the means to buy, as illustrated by the fact that millions are said to be starving in China, although the world market is flooded with wheat. They cannot eat because they cannot buy.

There appears to be a first class problem here for everyone with a brain to think.

Would more people in the world produce better markets or would they merely depress the markets by producing more food?—Regina Daily Post.

Producer (interrupting singer at voice trial)—"Does that end the first verse, miss?"

Singer—"Well, I've got to where it says refrain."

Producer—"Good. Please do as it says."

Caller—I'm afraid I'm going to tax your memory—

Mr. Bangs—Good heavens, has it come to that now?

Improve Your Turkey Stock

Turkey Approval and Banding Campaign In Saskatchewan

Recently compiled records of the 1929-30 turkey approval and banding campaign, conducted by the Poultry Division of the Saskatchewan Live Stock Branch, reveal that 2,172 turkeys were approved and banded. Despite the fact that a number of the birds were downed because of the poor growing season last summer, the results show a very logical improvement with respect to the number of birds graded as "A" or "B" with a corresponding decrease in the number of grade "C" birds.

Many breeders have disposed of all their approved turkeys which they had for sale. A few breeders are offering at greatly reduced prices, some good turkeys which are capable of improving the type, conformation and plumage markings of many flocks throughout the province.

For information as to the location of these turkeys, together with prices, those interested may communicate with W. H. McLellan, secretary-treasurer, Saskatchewan Turkey Breeders' Association, Poultry Division of the Provincial Live Stock Branch, Department of Agriculture, Regina.

Have Made Good Progress

Reindeer Herd Will Remain In Northern Alaska During Summer

The drive of 3,000 reindeer from the west coast of Alaska, eastward, to the delta of the Mackenzie River, in the North-West Territories of Canada, is progressing favorably, and in March the herd was expected to reach the basin of the Colville River, in northern Alaska, where it will remain during the coming summer, resuming the movement in October. A word of the progress of the reindeer purchased by the Dominion Government, was brought by Mr. A. E. Forsell, of the North-West Territories and Yukon branch of the Department of the Interior, who recently returned from Alaska. While in the north, Mr. Forsell selected the animals to be included in the movement, and saw the drive well under way before he returned to Ottawa.

Early this spring, Mr. R. T. Forsell, of the North-West Territories and Yukon branch, will go north by aeroplane, to complete arrangements for the reception of the herd in the beginning of 1931. Materials for the erection of the corrals, huts, and other structures, have already been shipped north.

How He Figured It

They were talking rather confidentially in the club.

"But, surely," said Wilson, "you and your wife are as one?"

"Of course, I know we should be," said Watson, the henpecked husband, "but we are not. As a matter of fact, we are ten."

"Ten?" replied Wilson. "How do you make that out?"

"Well," said the other, dropping his voice a little, "she's the one and I'm the nought."

Willie—"I must say I enjoyed the party, Mrs. Smith."

Hester (delighted)—"Honest, you little darling!"

Willie—"Yes, even though I hated it. Mother would spank me if I didn't."

Strong Minded Children

Choose Careers Early

And Usually Stick To Their Decision Says Educationist

"When I grow up, I'm going to be a policeman" was a far cost an' walk around an' take down license numbers."

So maintains the boy next door. Or average little boys, for that matter.

"An' when I grow up, I think I'll be a nurse, so I can help give the babies their bath," returns the little girl next door.

Down in New York, lives an educationist, one Professor Harry Dexter Kilton, of Teachers' College, Columbia University, who maintains that such a speech, from a strong-minded child, indicates that in all probability the child will abide by his decision when grown up.

Dr. Kilton recently completed a vocational study in New York which showed that 14 per cent. of policemen and 12 per cent. of nurses decided upon their careers before the age of 12. His study revealed that although most boys and girls have no vocational interest, the few who do make early selections, stick fairly closely to them when they reach adulthood.

"We should not expect most immature persons to have an interest in such a particular vocation," Dr. Kilton maintains.

Other results showed that nurses are far more interested in their profession than teachers. This was discovered by submitting to nurses a question used several years ago to test the teachers. They were asked what activity they would devote themselves to if they had a million dollars and did not have to work. The answers to this question, correlated with a mathematical scale of interest, showed that 33 per cent. of nurses had a maximum interest in their work as against 19 per cent. of teachers.

It was found that the ages at which interest cropped out in policemen and nurses with regard to their eventual life's work varied from three to 34 years, with the largest number grouped around the ages at which they were eligible to enter the field.

The High Art Of Giving

Red Cross Offering Carries An Inspiration and Message Of Faith

In a busy Red Cross Headquarters in the city of Edmonton, there comes to light from time to time a story which proves that the spirit which inspired the place was man to place her all on the altar of God's work is still capable of moving the world today. Many touching tales of sacrifice come to hand, of people who are poor, but not too poor to share with others the few blessings which life has bestowed upon them.

The dollars and cents given with this spirit of Christ-like service have a hallowed meaning, and frequently inspire others to a like sacrifice. "Not what we give, but what we share, for the gift without the giver is bare, who gives himself with his goods, his body, his mind, his hungering neighbor, and Me," says the Great Teacher.

Thus the small sum of one dollar and seventy-five cents which came in from a countrywoman in Northern Alberta, has a spiritual value to Red Cross, for the giver says she has sent a tenth of her earnings. To the Red Cross workers who look out on life from its sorrowing and suffering viewpoint, there comes from this simple offering an inspiration and a message of faith to carry on in spite of all difficulties.

Parrots Not Allowed

A drastic order that all parrots be immediately discharged from the United States navy has been handed down by Acting Secretary Jahnke. The birds have acquired a reputation as carriers of psittacosis or parrot fever. Secretary Jahnke's order was designed to prevent the spread of the disease.

New Post Offices

Sixteen new post offices were built in Canada last year, the largest being at Saskatoon, and costing \$725,700. The buildings were distributed by provinces as follows: Nova Scotia, 1; New Brunswick, 1; Quebec, 2; Ontario, 5; Manitoba, 2; Saskatchewan, 5; Alberta and British Columbia each 1.

Mike: "Did ye ever spake before a large audience, Pat?"

Pat: "O' di wance."

Mike: "An' pwat did ye say?"

Pat: "Not guilty."

Dentist (to youngster who has broken a tooth): "How did you do it?"

Motorist's Son: "It happened when I was changing gears on a bulleyea."

Canada Week In Bristol

People Of British Isles Becoming More Familiar With Canadian Products

Mr. Douglas S. Cole, Canadian Government Trade Commissioner stationed at Bristol, has evidently left no stone unturned to make the special "Week" planned to give the housewives of Bristol an opportunity of becoming more familiar with Canadian food products, a success. This special "Week" terminated on Saturday last, and, according to the "Evening World," it was successfully inaugurated by the Lord Mayor of Bristol, who, together with other civic officials, members of the Press and the Bristol Provision Trades Association, were guests of the Canadian Government at luncheon at the Grand Hotel.

Early in the week, Hon. Mr. Buckle, Minister of Agriculture for Saskatchewan, wired as follows to Mr. Cole:

In Saskatchewan we are greatly interested in your efforts to increase the sale of Canadian farm products in the West of England, and express our appreciation. In the forward development of our agricultural policy recognition is given to the fact that high class products as well as volume are demanded in the markets of the British Isles, and it is our ambition to meet such requirements. Reciprocal trade within the Empire is a most worthy objective and we trust Canada Week in Bristol will be highly successful for all concerned.

To which Mr. Cole replied:

"Many thanks for cabled good wishes. Over 400 Bristol stores will be stocking, displaying and selling Canadian food products during Canadian Week. Every co-operation received from Lord Mayor of Bristol, wholesale and retail trade associations and other bodies."

The Bristol Times and Mirror has the following to say:

"It seems that Canadians, with two or three hundred years' experience of bottling food, have found tens of thousands of people in this country willing to buy their goods if they knew what names to say at the counter, and the shop is to be run with a view to familiarizing people with the actual brand names. It is said the law is so strict in Canada that if packers are successful in passing government inspection there they have no need of worrying about the pure food laws of any of the other countries in the world to which they send. The organizers hope that Bristol will be the ideal testing centre for the West of England, where samples in the city are being increased to meet the demand anticipated."

Auto Horns Banished

Finland and Norway Decide It Is Unnecessary Noise

Finland has made a start toward the suppression of city noises by forbidding the use of motor horns in the town of Abo which has demonstrated that the horn is no more necessary on the automobile than it was on a horse, a one-horse bus or a hay wagon. News of the demonstration reached Norway, and in consequence the Royal Automobile Association of Oslo has proposed that in every city of that kingdom the use of the horn shall be done away with, and the attention it involved redirected to skillful driving.

Manitoba Indians Will Exhibit

Indians of three Indian Reserves in Manitoba will have exhibits of grain at the 1932 Grain Show, in Regina, according to P. G. Lazebny, Indian agent at Birtle, Manitoba, who received a copy of the prize list for the 1932 World's Grain Exhibition and Conference, asking the executive for additional copies. "It is my intention to have some exhibits of grain from at least three of the Indian reserves of this agency," he wrote.

Sir Wilfred Grenfell has appealed for gifts of old silk stockings to be used by women of Labrador in making rugs.

"What are you doing?"

"Playing an 'Alpine Club' and Jack is the mist."—Pages Gales, Yverdon.

"What did your sister say when you told her I had my 26th birthday today?"

"She said it was quite time." —Karikaturen, Oslo.

Geographical Features Named After Indian Chiefs Are Numerous From Coast To Coast

Geographical features named after Indian chiefs are numerous in Canada. It is exactly 100 years since the first appearance on a map of the name Petawawa. According to the records of the Geographic Board of Canada, Petawawa River occurs on a map made in 1829 by Colonel John By, who built the Rideau Canal.

The name is now applied to the military camp on the Petawawa River in Renfrew County, Ontario. The Indian chief, Petawawa, is said to have hunted in the region and the meaning of the name is "the sound is coming" or "approaching sound."

In some cases an Indian has been commemorated by a name given him by the whites. There are several examples of this nature in New Brunswick, where Barnaby River, Bartling River, Cain River, and Taxis River bear the names of Indian chiefs who once lived on these streams.

In Quebec the town of Donnacona recalls the "Lord of Canada," who was taken to France by Jacques Cartier, in 1536, and died there. In Manitoba, Peguis post office takes its name from a Saulteaux chief who, in 1836, was granted an annuity of \$25 by the Hudson's Bay Company. He was a friend of the colonists of the Red River Settlement (Winnipeg), and well disposed towards the whites.

In Saskatchewan, Outkine Hill, according to tradition, commemorates a Sarcee who was killed on it in battle with Crees. In Alberta, Crowfoot Village, Mekasto railway station, and Chiniki Lake, are a tribute to the worth of Indian chiefs who on the coming of white men ceded their title to vast areas forsook tribal warfare. Crowfoot, head chief of the Blackfeet, was a keen business man, not a warrior, who kept his tribe at peace with the whites. Mekasto, or Red Crow, head chief of the Southern Bloods, was loyal throughout the 1885 rebellion. Chiniki was a S'oney Indian chief.

Kanaskis pass, in the Rockies, commemorates an Indian who made a wonderful recovery from the blow of an axe. Pouce-Coupe River, in Alberta and British Columbia bears the name of a Beaver Indian chief who settled on the river with 500 followers.

The name is French for "cut thumb." In British Columbia, Kinbasket Lake, an expansion of the Columbia River, was so named in 1866 by Walter Moberg, C.E., after a Shuswap Indian chief who was of service to him on an exploratory trip. Nicola Lake commemorates an Indian chief whose other name, Nwistemeekin, meaning "walking grizzly bear," well describes his character.

To Grow Early Potatoes

B.C. Association Imports Certified Seed From Prince Edward Island. For the purpose of supplying the prairie farmers with early potatoes, some fifty farmers on Lulu Island, British Columbia, have formed the Richmond Early Potato Growers' Association. Each member will put in a special plot of two or three acres of early potatoes, which will be planted simultaneously at the end of the present month, so that they will be ready for market at the same time. Irish Cobbler has been selected as the variety to use and a car-load of certified seed has been imported from Prince Edward Island.

Pankhurst Statue Unveiled

A statue of Mrs. Emmeline Pankhurst, who led the movement for the enfranchisement of women in Great Britain, was unveiled in Victoria Tower Gardens, Westminster, in the presence of many of the leading fighters in the suffrage cause. Many political leaders were present and Stanley Baldwin, the former Premier, performed the unveiling ceremony.

"Sing us a song."
"I dare not with all these people."
"Pooh, they won't listen." — Musket, Vienna.

W. N. U. 1831

Here To Give Service

Paper As Community Affair Has Most Difficult Task

A newspaper is different from any other business. It is a community affair. It is for service to the people, and not for any individual. The job of a newspaper is first to provide news to those who subscribe to the paper. They pay in advance because they want news, and the newspaper's part of the contract is to provide the news. That is why newspapers find it hard to comply with requests by individuals to leave out items of news. If newspapers left out unpleasant news to individuals every time they were asked to do so, the day would eventually arrive when there would be no newspapers.

In the case of court cases the newspaper treats such as cases, not as individuals. There is no more animosity in a newspaper reporting public proceedings than there is in police or other public officials doing unpleasant things to individuals, such as taking them before the courts. It is part of the job in each case. In the instance of newspapers, with police and other officials, care is always taken that the innocent shall not suffer.

Newspapers have to be trusted to do the right and fair thing as far as possible at all times, consistent with adherence to the clear and straight path of duty. The task is always a difficult one, and the public should realize it.

(By Annette Worthington)

Lingerie detail presented in egg-shell crepe collar of a crepe silk in dark blue background printed in green, is decidedly chic to wear. The egg-shell crepe appears again in neat turn-back cuff.

Style No. 3372 that can be had in sizes 36, 38, 40, 42, 44 and 46 inches bust, achieves a most unusual slenderizing effect through the moulded long-waisted bodice, and fitted circular skirt. A narrow belt indicates normal waistline, which is generally becoming to most figures.

Black silk crepe with asparagus, brown with turquoise blue, purplish-blue chiffon, crepe marocain in putty beige and canary crepe, in turtleneck are ideal selections.

Pattern price 25 cents. Be sure to all in size of pattern. Address: Pattern Department.

Problems Poultry Men Have Not Solved

Why Eggs Should Differ According To When They Are Laid

Why should eggs laid in January, February, and March, make light cakes, and eggs laid in May, June and July make heavy, soggy cakes? Why should eggs laid in March give a low percentage of chickens as compared with eggs laid in January, February, April or May?

These were some of the unsolved problems mentioned by Professor R. K. Baker, head of the poultry department at the University of Saskatchewan and producers of the world's champion hen, in his discussion before the Saskatoon branch of the Canadian Society of Technical Agriculturists on "some discoveries that have affected poultry breeding."

Discoveries regarding vitamins had made the 300-egg hen possible. Leg weakness, partial paralysis and crooked neck bones were becoming rare since vitamins had been studied and the birds were getting sprouted oats, cabbage, carrots and cod liver oil.

X-ray experiments on eggs were giving interesting results. A short exposure is said to improve the hatching percentage of the eggs. An exposure of 5 to 20 minutes is said to increase the rate at which chicks grow after hatching. An exposure of several hours is said to affect the sex ratio of chicks so that more of the chicks are females.

When the University of Saskatchewan flock was started in 1913 the laying average was less than 100 eggs per hen. By 1926 it was over 175 eggs. Last year's average has only been worked out for one farm. The 44 daughters of one bird average 217 eggs. There was not a poor bird in the family. The 358-egg champion came from another family.

Colour Indicates Real Grade

Maple Sugar Or Syrup Of Light Color Is The Best Grade

The maple sugar industry is one of the oldest known to this continent. It was brought to the early settlers by the native Indian and today is of outstanding commercial interest. The Dominion Department of Agriculture finds that quality in maple sugar and syrup is clearly indicated by colour. The grading rule is the lighter the product the better its quality. Grade 1 is very light in colour, corresponding closely to clover honey in appearance. Grades 2 and 3 are perceptibly darker, while Grade 4 corresponds quite closely to the colour of buckwheat honey. Quality counts in maple products as in everything else.

Completing Dairy Survey

Dr. Misener, of Cornell University, N.Y., has returned to his work, after completing the field work of a survey of the dairy industry of Saskatchewan. J. K. Finlayson, of the Saskatchewan Markets Branch, has gone to Cornell with him, where he will complete the summarization of the facts and figures, which will occupy about two months.

Nearly 30,000 tons of beans were shipped daily during the recent bean harvesting season in southern China.

COLONEL W. G. BARKER, V.C., D.S.O., M.C.

The photograph here shows Col. W. G. Barker, V.C., D.S.O., M.C., with bar, who was instantly killed in Ottawa, when his aeroplane stalled at a low altitude and crashed to the ground. Col. Barker was one of the greatest of Canada's war aces, having 62 enemy aeroplanes to his credit.

Three Hundred Millions Spent By American Tourists In Canada During Year 1929

Hard Legal Problem

English Magistrates Puzzled Over Definition Of "Farmer"

What is a farmer? Hundreds of people who gain their livelihood from their own land in the counties of England are affected by that legal question.

Large sums of money, too, are involved, for dependent on the answer to the problem is the amount of rates which may, or may not, have to be paid by the men and women who consider themselves "farmers" in the legal sense.

Is, for example, a bee-keeper a farmer? Can a keeper of chickens be called a farmer?

One side of the difficulty has been settled by the Oxfordshire Quarter Sessions in considering a rating appeal—the first case of its kind. The magistrates at the Oxford County Hall decided that a bee-keeper was a farmer, and, as such was entitled to have his home rated as a "farmhouse."

Christopher Bartlett, of Sandford Mount, Charlbury, appealed to the quarter sessions against the assessment of his house, because he was a bee-keeper. His house had been assessed at £100, whereas he maintained that as a farmhouse the assessment should not be more than £40.

"He is the largest bee-farmer in England," said E. Gost, counsel for Mr. Bartlett. "His home has been assessed as a country house, whereas it is used by a man who is working an agricultural holding and is therefore a farmhouse in fact."

Dr. Earengy, counsel for the rating authority, and one of the foremost barristers on the Oxford circuit, submitted that bee-keeping was not farming. R. T. Barrie, the rating officer for the Chipping Norton Council, gave evidence that, in his opinion, £100 was the fair and proper assessment for Sandford Mount.

Eventually the magistrates upheld the appeal of Mr. Bartlett, and fixed the assessment of his home at £60—a reduction of £40 from the former rateable value.

Publicity For Grain Show

Exhibits Will Be Displayed At World Poultry Congress

World Grain Exhibition and Congress, to be held in Regina, in 1932, has obtained exhibition space at the World Poultry Congress, to be held in London, this year, at Crystal Palace, London, England. Oscar Turcott, Canadian Exhibition manager, London, England, will arrange the display that will occupy a square with 576 square feet of space at the entrance to Crystal Palace.

The World Grain show will have the display of grains and other crops to be exhibited in Regina situated in the commercial section of the displays at the World Poultry Congress, and announcements of the World Grain Show, such as are being distributed from Regina, will be distributed from the exhibit square to delegates from all parts of the world attending the congress.

Similar exhibitions of grain and associated crops will be made at Antwerp, Paris and Buenos Ayres under the personal direction of Mr. Turcott.

Plant Clean Seed

Need For Planting Clean Seed This Year Is Greater Than Ever Before

You may not always be able to afford finest quality registered seed for planting; but you can always afford clean seed for planting. The seed branch of the Dominion Department of Agriculture are urging the planting of clean seed this year more than ever before—clean seed pays, particularly with the weed menace reaching the alarming proportions it does in many parts of Canada today.

There are many effective ways of cleaning seed, depending upon the quantity to be cleaned, location and equipment. In many parts of Canada seed cleaning machinery is readily available for the purpose, while in others suitable screens can be adapted to the farming mill, and in some of the more remote sections the old pioneer method of wind-cleaning is always available.

"To attain happiness," says a lecturer, "one must vibrate in tune with one's environment."

According to that, a man with St. Vitus Dance at a jazz concert would be in perfect bliss.

A first edition copy of Dickens' "Great Expectations" was sold recently in London, for \$1,275.

Gold from the south washes over the international boundary in great waves as soon as the tourist season begins. The year 1929, for which figures were just made public, was the last on record. Practically 300 millions were spent in Canada last year by tourists.

Canadian tourists in other countries, mainly the United States, were also generous with their cash, keeping in mind the Dominion's small population. One hundred and eleven millions were spent by Canadians in other countries, according to bureau of statistics' estimates.

The balance of tourist business in Canada's favor, amounting to some 189 millions, was twice as great as the adverse trade balance (visible balance) for 1929.

The expenditure grows by leaps and bounds. Automobile tourists from the United States spent \$25,000,000 more last year than in 1928, and steamer and train tourists another \$3,000,000 more.

When tourists' expenditures are added to "visible" trade figures with the United States, expenditures here to exports, and Canadian expenditure there to imports, the present difference of \$330,000,000 in favor of the United States is cut in half.

Less than a decade ago (1920) the expenditures of tourists in Canada was calculated at \$83,000,000.

Oldest Trainman

Canada's Oldest Trainman Celebrates Birthday At Truro, N.S.

Claiming to be Canada's oldest trainman, Robert Williams, of Truro, N.S., rounded out the ninety-one mark on March 1st. He was born at West River, Antigonish County, Nova Scotia, March 1, 1839, and when seventeen years old got a job on the construction of the Nova Scotia Railway. Feeling the call of the sea, he joined a sailing vessel and rounded "The Horn." On a trip from Liverpool, England, with troops for a far-off station, his ship was wrecked while rounding "The Horn," and he was among the 49 saved.

Once he fell forty feet from the rigging and broke an arm and also injured an eye. In the early seventies, he decided to give up the sea, and in 1874, joined the service of the Intercolonial Railway, now part of the Canadian National Railways System, and retired on pension in 1910, at the age of seventy-one.

Russian Bees Stingless

Entomologists Have Proved This After Three Years' Experiment

That everything from Russia is not dangerous was established with the announcement that Russian bees do not sting. This was the result of three years' experimenting at the agricultural station at New Brunswick.

The bees from Russia produce as much honey as Italian bees, but swarm less frequently, it was said. During the entire experimentation period neither Ray Hutton nor R. P. Diggers, entomologists at the station, ever were stung.

Earned His Publicity

Floyd Waite, of Los Angeles, claims the world's record or whatever it might be called for staying buried six feet in the ground in a box with a six inch pipe and a telephone for outside connections for 301 hours, and no one has been found so far who does not agree that he is welcome to it. Floyd was buried Feb. 22 with nothing for company but a telephone.

"You will suffer poverty until you are sixty-five."
"And then—and then?"
"You will have got used to it."

"You said I was a rogue, a liar, a swindler—I have proofs of it."
"Then you know what I said is true." — En Rolig Half Timma, Gollnberg.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet. The pain de-

parts. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid indigestion. Each bottle contains full directions—any drugstore.

CHAPTER VII.—Continued

Jim replied, as he put a generous slice of shortcake on Grandma's plate. "You're right. The committee thought the fireworks would bring a crowd to the supper, and took up a collection for the cause. They got two dollars out of me, and I don't intend to miss the show. I tell you what, Grandma! you needn't miss it, either. I'll take you down in the car soon as it gets dark."

"My soul!" breathed Grandma. "I haven't been out in the evening since I don't know when. I don't know what Charman would say, or the doctor either, but, recklessly, 'I'm going to do it! You finish up that shortcake, Jim. It's no good left over and 'twould be a shame to waste it. Charman said after Emmy, Bascomb's recipe, and it's worth feeling a little sick next day over. Pour me another cup of tea, son. I must be fortified if I'm going gallivanting all the evening. I haven't got any green hat, she added with a twinkle, 'but I'll wear my Sunday bonnet and put Great-grandmother Davis's gray crepe shawl over my coat, so you won't feel ashamed of your company. That shawl came clear from China, and a summer boarder who stopped in one day for a skein of embroidery silk, offered me three hundred dollars for it when she saw it hanging over my chair."

Jim whistled expressively as he arose to clear the table.

"I'd like to see the shawl! I'd refuse three hundred for it!"

"So would I," agreed Grandma, "but Charman was mad at the woman for even offering it. She's got the Davis pride. You can set the dishes in the sink, Jimmy; and I'll go get ready if you'll help me into the north room. There's that dog again with another bone! I'd like to see where he's planning to put it, but there isn't time. It looks as if Gypsy was something of a miser; but at

any rate, he won't be dependent on his relations in his old age! Here, Jimmy, lend me a hand. I'm all excited."

"So'm I," said Jim, "going out with a new girl this way!"

Grandma chuckled. "Say!" she called, as leaving her at the door of the north room, Jim departed toward the kitchen, "Charman said to leave the dishes in the sink; but you'd better set that pat o' butter in the ice-box, and the cream, too. I'll be ready in a jiffy. Maybe I'll be all day tomorrow to pay for it; but what's the use o' living if you aren't reckless once in a dog's age?"

"No use at all," grinned Jim, "and now you've set my feet on the downward path I don't care if I paint the town red. Take your time about getting ready, Grandma. There's not a bit of hurry."

He was still in the kitchen when the old lady appeared at the door again.

"My sakes! you've washed all those dishes!" she exclaimed, "and the dish towel, too. You'll make some woman a good husband, Jimmy, I'll say that."

"Aunt," you ashamed, vamping a young fellow this way? Jim bawled, as he wiped his hands on the roller towel. "Here, you hang onto me till I get you safe in that car. What'll I do with the door key, Grandma? Take it along?"

"You put it under the door mat, just where anybody who comes along'll know where to look for it," she responded whimsically. "It's a lovely evening, isn't it? I wouldn't mind riding a little way before the fireworks, if we've got time."

"Plenty of time. We'll run round past the Bascombs so you can see Emmy's new windows. They look corking."

Grandma sighed. There it was again—the thing that kept Charman from loving this nice boy. He couldn't see that those big panes of glass no more fitted the old Bascomb house than she herself would fit that cheap new bungalow by the station.

"I don't want to see Emmy's windows," she replied, as the engine started. "They don't belong in that old house; but I'd admire to ride round the cemetery till it's time for the show. I haven't seen the monument that Deacon Purdie put up for his fourth wife. It's dreadfully expensive burying four wives, Jimmy. I suppose if he'd foreseen how things were going he could have had 'em all engraved on one stone, and saved a sight."

"It's he's not careful," Jim responded soberly, "he'll have to invest in a bigger lot or be crowded out himself when his turn comes. They say he's making up to the Widow Moore, over to South Wickfield."

"My stars!" cried Grandma. "She must be thirty years younger than Edgar Purdie, and has got six children!"

"Sure!" smiled Jim, as he slowed up on entering the cemetery gate. "If those kids should all pass out in an epidemic, Grandma, we'd have to call a town meeting and enlarge the cemetery."

"I'm afraid," said the old lady, trying her best to look severe, "that you're making light of serious things, Jim."

"It sure is serious burying a widow!" Jim was serious, marrying a widow. "Here we are, Grandma. It's almost too dark for you to see it, but that's where the deacon laid his Sarah. Want to get out?"

"Good land, no! I can see well enough from here; but I wish you'd tell me what's engraved on the stone. Jimmy, the deacon always puts on my heart, and suffered with weak, smothering spells. Sometimes I would fall over and would have to be picked up and put to bed. I used several boxes of

his third, was taken without leaving a friend in Wickfield because of her sharp tongue, he had engraved for her, 'A good name is better than precious ointment.' I declare, Jim, I've been curious to know what he'd say for Sarah. They fought like cats and dogs."

"I'll allow that curiosity in two minutes," promised Jim, as he alighted and crossed the patch of grass on the Purdie lot. He was shaking his head soberly when he returned and said: "It looks to me, Grandma, as if the deacon had run out of Scripture verses and taken to the poets. He says of his last departed, 'A sweeter woman ne'er drew breath.' Can you beat that?"

"No," Grandma admitted gravely. "I can't, and I won't try. Seems sort o' like tempting Providence, uttering untruths like that, especially on a tombstone. While I've been sitting here, Jim, it came over me what he might say about Luella Moore, if she was taken first. I have commanded a widow woman, there, to sustain him. What you grumble about, sonny? It would be the truth, which is more'n the others are."

"That's right," said Jim, as he resumed the place beside her. "Or if he wants a change from the Scriptures, as we might suspect after what he says about Sarah, he could just put 'An old man's darling,' and be done with it."

Grandma endeavored not to laugh, but at last gave way to her natural impulse.

"I ought to be ashamed, thinking about Luella and letting a boy like you think 'em too," she said regretfully, "but I never could bear Ed Purdie. He was a mean boy, always putting snakes and toads down the girls' backs; and once he hung little Willie Kingsbury down the school-house well by the heels, and the child was never the same again. My! I think that bed of pansies handsome? Is it time for the fireworks to begin?"

"It's time we were finding a place to park; but we mustn't get so near that the sparks will fall on that three-hundred-dollar shawl. You warm enough, Grandma? If I let you take a cold, Charman will give me fits."

"She's liable to have fits herself if she sees me out this time o' night," chuckled the old lady. "Let's stop near the church, Jim, so I'll see her face when she comes out and finds me. Here we are at the common, and Ezra Bascomb is bringing out a box, too—fireworks most likely. That's right," as Jim stopped at the head of the Common. "This is a splendid place to see. And there's Charman and Doctor Carter along with her. Hasn't he got fine straight legs, Jimmy? There! He sees us. They're coming this way!"

CHAPTER VIII.

If Jim Bennett had been purely altruistic when he took Grandma Davis to see the fireworks that night, he was amply repaid when the old lady safe home again, Charman followed him to his car and detained him with an impulsive hand on his shoulder.

"It was dear of you, Jim, to give Grandma such a good time," she began ardently. "I don't know how to thank you."

He faced her, and at something in his eyes she dropped the friendly hand that rested on his new, well-fitting coat.

"I don't need any thanks," he said, honestly enough. "Your grandmother's more fun than any one I know—present company excepted. And the shortcake was bully."

"What shortcake? I didn't see you at the church."

He laughed.

(To Be Continued.)

Doctor—Mrs. Soansough, we shall have to get a nurse for your husband and you will have to watch him very carefully.

Mrs. Soansough—You're right, doctor. I know him pretty well.

Pains Around Heart Weak Spells. Would Fall Over

Mrs. James Vaneatine, Pibroch, Man., writes:—"I had pains around my heart, and suffered with weak, smothering spells. Sometimes I would fall over and would have to be picked up and put to bed. I used several boxes of

and it is now over three years since I have had a spell.

"I hope anyone who is in the same condition I was will give H. N. Pills a fair trial."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of note by The T. Milburn Co., Limited, Toronto, Ont.

Sniffeling CATARRH Relieved in 10 Minutes

Relief is instant—suffering stops at once—germs are destroyed—every trace of catarrh is removed. Think it over seriously. Here is a remedy that clears the throat, relieves hoarseness, coughing and bad breath. Irritating phlegm is cleared out, inflamed bronchial tubes are healed, throat and voice are strengthened.

Catarrhazone is pleasant and certain. You breathe Catarrhazone—there is no medicine to take. Large \$1.00 size is guaranteed; smaller size 50c. and trial size 25c. at all dealers everywhere.

A Fitting Tribute

Dr. Robertson Was a Man Great In Ideals and Great In Capacity For Service

A book, rather than an article so necessarily limited as a newspaper article, would do justice in keeping in the matter of tribute to his career with the life and works of Dr. James W. Robertson, whom death has just claimed at the age of 73 years. Here assuredly was a great man, a man great in ideals and great in capacity for service.

Dr. Robertson will be gratefully remembered by Canada, and her people for a host of outstanding achievements, and which had their beginning only a few years after he arrived in the Dominion from his native Ayrshire, at the age of 18. An interviewer has said of him, he was general consulting counsel for all Canada on matters of organization and social progress. His service to Canada began when he engaged with the operator of a Western Ontario dairy factory while still in his teens, for a salary of \$12 a month. A few years later he was professor of dairying at the provincial agricultural college at Guelph. After that he was Dairy Commissioner of Canada, and attached to the Dominion Experimental Farm, at Ottawa. Then came a period as principal of MacDonald College, at St. Anne de Bellevue, Quebec, which, with Sir William Macdonald, he helped to found. Somewhere about this time, too, he conducted a national campaign in the interests of better seed for dairy cows.

For service, too, he became chairman of the Canadian Conservation Commission and later chairman of the Royal Commission on Technical Education, a body whose activities paved the way for Canada's technical school system of today. Many other useful activities were also his in the course of his career. He founded the Victorian Order of Nurses, had much to do with making the Canadian Red Cross the vigorous effective organization it now is, and for 11 years, and up to the time of his death, he was chief commissioner of the Boy Scout movement in Canada.

Dr. J. W. Robertson was a genius, with that industry and passion that makes genius doubly effective, and with these qualities was a public spiritedness that made him a servant and benefactor extraordinary of his adopted country and his time—Regina Leader.

Picture Theatre On Wheels

Tree-Planting Car Starts Annual Trip Over Prairies

The well known tree planting car, used by the Canadian Forestry Association, is about to start its twelfth year of prairie campaigning. The car is fitted up like a modern motion picture theatre, including some talkie features and graphic motion pictures of prairie planting, colored slides of homes showing the transformation of bleak dwelling places to homes beautiful and attractive by trees, presents an appeal that is immediately taken advantage of by the prairie dweller. In addition, other motion pictures show the birds that come with the trees and the wild life that is attracted with the protection that trees afford. Other features are graphic motion pictures of other parts of Canada and always the comedy to enliven the presentation for young and old alike.

B.C. Herring Industry

The dry-salt herring industry, of British Columbia, with its one market, the Orient, continues to expand. In 1918 the year's catch was 172,610 cwt, while in 1925 it had grown to 1,681,174 cwt. Figures for the season ending February 5th, 1930, are not yet available.

Since Lindbergh's Trans-Atlantic flight \$300,000,000 has been spent on airports in the U.S.

Minard's Has Wonderful Antiseptic Power.

Favors Greenland For Aerial Route

Would Make Atlantic Flying Safer Says Rumanian Meteorologist

An aerial route between North America and Europe must go by way of Greenland to embody a proper degree of safety in the opinion of Dr. Constantine Dumbrave, Rumanian meteorologist, who has just completed two years in the north investigating aviation possibilities.

Dr. Dumbrave said he favored a plan for the establishment of landing fields and meteorological stations every 500 miles between Ottawa and Iceland. The first landing field and station he proposed to establish at Hudson Bay; the second at Hudson Straits; others on the west coast of Greenland, at Iceland, and possibly at the Faeroe Islands. From the latter islands, he believes, planes would have little difficulty making straight-line flights to the British Isles and then to the European mainland.

Dr. Dumbrave expects to return to the Arctic again this year for further observations. He estimates \$1,000,000 would be required to establish the route and officials of the National Defence Department let it be known they considered the project feasible.

BABY'S OWN TABLETS A HELP TO MOTHERS

There is no other medicine of as great a help to young mothers as Baby's Own Tablets. These Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach; correct constipation and indigestion; break up colds and simple fevers and make the cutting of teeth painless.

Mothers who keep a box of the Tablets in the house always feel safe from the sudden attacks of illness that seize their little ones. If Baby's Own Tablets are given on the first sign of illness the baby will soon be right again. Concerning the Tablets, Mrs. B. G. Carver, Lyndale, P.E.I. writes:—"I always keep Baby's Own Tablets in the house and find them a wonderful help in keeping my baby well."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Sitka Spruce Used In Planes
Sitka spruce on the Pacific Coast of Canada with its light weight combined with its strength, is used universally in aeroplane manufacture.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

"Is it true that a clock can go 14 days without winding?"
"Yes."
"Then how long will it go if it is wound?"

Minard's is Best for Grippe.
Ruins of an old Roman wharf, where no doubt the emperor's pleasure galleys were once moored, have been found at Lake Nemi.

From 14,000 brains weighed, Topinard finds an average weight of 1,361 grams for men and 1,200 for women.

Nurse Gains 7 lbs. In 2 Weeks With Yeast and Iron

"I am a nurse at the hospital," writes Miss Martha Burns, "and I want to let you know that I am glad to recommend your Ironized Yeast."

"It gave me a good appetite. I got strong and gained 7 pounds in 2 weeks. I could write all day about how much good Ironized Yeast did me. You would be surprised at the strength I gained in 3 or 4 days."

People everywhere are amazed at the wonderful benefits of Ironized Yeast. Many write they were doubtful when they started. But after taking it regularly for only 3 or 4 weeks they gained 5 to 15 pounds. Ugly hollows fill out. Skinny limbs become gracefully rounded. Blotched skin gets clear and beautiful.

Only when Yeast is Ironized is it more effective. Ironized Yeast is noted for the wonderful benefits of Ironized Yeast. Many write they were doubtful when they started. But after taking it regularly for only 3 or 4 weeks they gained 5 to 15 pounds. Ugly hollows fill out. Skinny limbs become gracefully rounded. Blotched skin gets clear and beautiful.

Go to any druggist today and get a full size treatment of Ironized Yeast. If after this generous trial you are not delighted, your money back instantly from manufacturer.

Little Helps For This Week

"These are they which came out of great tribulation, and have washed their robes, and made them white in the blood of the Lamb."—Revelations vii. 14.

Constant sunshine, however welcome, never would ripen fruit or flower; Giant oaks owe half their greatness To the scathing tempest's power.

Human strength and human greatness Spring not from life's sunny side; Heroes must be more than drift-wood Floating on a waveless tide.

All the difference there is between what looks like a worthless stone and a gem is in the cutting and the grinding. All the difference between bullion and coin stamped with the king's face is in the smelting and the minting. All the difference between a wilderness and a garden is wrought by weeding and pruning. All the difference between a block of marble and a statue is produced by the mallet and the chisel. God has for us up yonder, by and by, I know not what noble ministries and what exalted places of beauty and of power. Since He knows what niche we are to fill, trust Him to shape us to it.—M. J. Savage.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Extirminator.

British flying schools have more applicants for instructions than they can care for.

The famous palace of the Alhambra, in Spain, was originally a fortress capable of holding 40,000 men.

No beaver dam is ever finished, or ever without need of repair.

Before Her Baby Came

"I have used several bottles of Lydia E. Pinkham's Vegetable Compound and find it helps me wonderfully, especially before childbirth. I have five lovely children. After my last baby came I had a miserable pain in my right side so I bought another bottle of the Compound and I feel fine now. I work outside during the fruit season in addition to my housework."—Mrs. Charles Slingerland, R.R. #4, St. Catharines, Ontario.

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

Took a Farmers' Government

Commending the action of the Alberta Government which took the lead in dealing with the stock market situation, the Vancouver Sun says in part: "Canada has nine Attorneys-General, has a Minister of Justice, any or all of whom are charged with the responsibility of law and have complete control of legal machinery to see that the people get a run for their money. In addition Canada has seven or eight banks enjoying a complete monopoly of our financial business and, as token of their supposed reliability and dependability to keep the financial machine of Canada on an even keel, a half dozen of them have received knighthoods. Yet with all this regal and legal and financial ability, the Canadian public has for the past three months received one of its worst financial trimmings and no one raised voice or hand until things got so bad that the Farmer Government in Alberta called a halt.

"Ten years ago it took a Farmers' Government in Alberta to arouse and show the political parties of Canada that public office must mean something more than the mere drawing of a salary. What the public wants and needs is not inactive authority, but courageous, commonsense leadership, that leadership should make itself felt."

W.I. Meeting

The Women's Institute met at the home of Mrs. F. E. Jacques Wednesday afternoon with Mrs. R. D. Vanhook and Mrs. Jacques joint hostesses. The attendance was good. Mrs. W. A. Todd gave a paper on "The Legislature" and Mrs. Jacques gave a paper on "Immigration". The following committee was appointed to see to having the ground around the town prepared for tree planting: Mrs. M. L. Chapman, Mrs. C. W. Rideout and Mrs. M. C. Nicholson.

Heard About Town

Messrs. Hanson and May, the Sibbald artists, were in town this week painting signs for several business firms.

School Inspector Scott, of Oyen, made an official visit to some of the rural schools in the district last week.

G. A. Huggard, who had been visiting relatives in Calgary and nearby points for a couple of weeks, returned on Monday morning.

M. L. Chapman, L. S. Dawson, W. S. Lee, Jas. Rennie and J. G. Connell attended the Royal Arch Chapter in Youngstown on Thursday evening of last week.

Lorne Proudfoot, M. L. A., who has been spending several days at home, on Monday morning returned to Edmonton. He thinks the Legislature will prorogue this week.

O. L. Mielke was a visitor in Calgary on Saturday and Sunday. He says it commenced snowing in the city about 10 a.m. and continued all day, melting as last as it fell.

Leslie Berry is the champion snooker player in this neck of the woods. In the big tourney last week in the local pool room he eliminated all other contestants, and was crowned the winner. Ronald Massey was the runner up.

Constable Shaw, of the Youngstown detachment, was here on business on Saturday. A car not bearing 1930 license plates caught his eagle eye and he took the owner before a cad at Cereal. The fine and costs amounted to \$11. A local farmer owned the transgressing auto.

Frank Sayers, who had taken two car loads of cattle to the Winnipeg market, returned on Sunday morning. He reports a satisfactory trip and was pleased with the prices received. He was joined on the way home at Saskatoon by Mrs. Sayers and children, who had been visiting in that city.

A meeting of the directors of the Agricultural Society will be held in the agricultural hall on Saturday, April 12, at 2 o'clock p.m., for the purpose of revising the prize list. Any director with suggestions, please attend or mail same suggestions to the secretary, Horace Dunster, before that date.

Mr. and Mrs. C. E. Neff Thursday of last week returned after a lengthy vacation. Mrs. Neff has been visiting with relatives and friends in Hanna and Calgary, and Mr. Neff was on a trip to Bermuda, on which he had a wonderful time hobnobbing with the idle rich. Their friends are pleased to see them both looking hale and hearty.

The Ladies' Card Club met with Mrs. J. G. Connell on Tuesday evening. Mrs. L. S. Dawson had the highest score and was the recipient of a pretty salad dish. The time being so close to April Fool's Day, the ladies could not resist the temptation to spring a joke on the winner. This was done. It brought forth much merriment. The next meeting will be with Mrs. M. L. Chapman.

Cowley Bros. have installed a special equipment for renewing tractor valve seats. This information will be greatly appreciated by tractor users of every make and model. This work has been in such a demand that the local garage found it absolutely necessary to go to the expense of the equipment, being their desire to give service to the farmer in their every requirement. This work is inexpensive and will give your tractor added power and economy.

Small Advertisements

Advertisements under this heading are charged at the rate of 25c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.

Items of Interest

While Belgian coal mines have 26,000 fewer workers, the production is almost equal to that of 175,000 men a year ago.

Operated by an electric motor, a safety razor has been invented that consists of two parallel slotted shearing plates.

With accurate measuring instruments a scientist has found that trunks of pine trees shrink in the daytime and expand at night.

Wooden flooring blocks have been invented that are fastened together with pegs instead of nails and laid on a composition that deadens sound.

Heard About Town

The Ladies' Aid will meet with Mrs. Wm. Meade on Wednesday, April 9, at 3 p.m.

Mrs. M. C. Nicholson visited her son, A. S. Nicholson, Calgary, for a few days, returning Tuesday morning.

Mrs. H. Howton left Friday morning for Calgary and Carstairs, where she will visit for a few weeks.

Joe Haggerty on Wednesday morning arrived from Montana, where he has been for the past two weeks looking after business interests.

W. A. Todd, in the absence of the buyer for the Pioneer Grain Co., Youngstown, will be in charge of the elevator at that point for a month or two.

N. D. Stewart, A. Spreeman and Alex McLennan, who have been attending the Nazarene convention in Calgary for a few days, returned Monday morning.

A base ball meeting will be held in S. H. Smith's store this (Thursday) evening at 8 o'clock for the purpose of organizing for the season. If you are interested in this line of sport you should be there.

Collholme Collections

N. D. MacKinnon is improving slowly in health.

Mrs. B. Bjorvick is laid up through illness this week.

Dan MacKinnon and N. Morrison are hauling sand this week for road repairing.

"Mike" Thompson has been at the Cereal hospital for the past week receiving medical attention.

While away A. Spreeman has put his progressive boys and hired man to work painting his barn.

A very large attendance at the Pool meeting, held in the Collholme school on Saturday, is reported.

The weather is somewhat cooler now, and, according to the weather prophets, it will continue so for some time.

Mrs. MacDowell, Messrs. MacDowell, Stewart, MacKinnon and Spreeman have been in Calgary for the past week attending the District Church Assembly.

Inspector Scott visited the Collholme school on March 27. He is well pleased with the progress of the pupils, and the pupils all speak well of him. There are

Big Stone Bulletins

H. R. King was a visitor at Government House last week.

Messrs. Stuart, King and Haug have each a nice acreage in good shape for this season's crop.

The fresh air taxi was operated by Mrs. Paul Seeger and daughter, Ida, on the last trip. Amos Amos expects to be out again next week.

The community was shocked to hear of the fatal accident to Percy Brown, and express their sympathy to Mr. Goodwin in this sad occurrence.

A Jacobson and son purchased a new 4 bottom tractor plow recently. Now we may expect to see old mother earth turned up in their vicinity.

only three months left until the departmental and final examinations for the higher grades.

On Friday the pupils of the Collholme school saw, much to their disappointment, the last of their ice disappear in waves and foam. Skaters have used the ice every day since March 3.

Dan Bell is in Hanna today on business.
